# Lasting Impressions

As another summer comes to an end, thoughts of books and papers fill our heads and visions of new beginnings float through our minds.

As the new year begins, we welcome Provost McAllister and Dean Koogle to the Elizabethtown Family. Also, we say good-bye to Preservation Hall, which did not quite live up to its name.

We welcome the faces of the Class of 2001 and remember the faces of our friends who have recently graduated.

It is a new year and a new time to explore what life has to offer. As we move through this academic year, let us make and remember those impressions that will last a lifetime.

## Life on Campus

Student life at Elizabethtown College is always changing and is different for each person here. Still, there are things that seem to capture the time here for almost everyone. This past year has seen a lot in the way of trends with new styles of clothes and hair and especially body art.

Roommates are an important part of our life on campus and can turn into life long friends if you are lucky. It is with them and with other friends that everyone works together to decorate rooms and halls to make it seem more like home.

Speaking of home, we all spend tremendous amounts of time calling, writing and emailing those we miss. When we are not on the phone or in class, it is time to relax with various kids of hobbies, stress relievers and even shopping. Occasionally, some students take time to round up friends and go to see concerts as a way to have fun.

As we continue through our years here, we start to prepare for life after college by participating in internships and other career related situations, as well as moving for the dorms to the Quads or even off-campus.

After four years, the time seems to have gone by so quickly but all these experiences leave an impression on us that we will remember long after we leave Elizabethtown College.

#### What's Hot & What's Not

#### Spotting Recent Trends on Campus

Trends come and go faster than you can blink; by the time you get acquainted with them, they disappear. The latest trends at Etown, however, have been waiting for the right time to surface, and there's no time better than now. Among various styles lie the true trends of 1997 and 1998--body piercing, tattoos, weird hairstyles and even crazier hair colors.

People partake of these trends for many different reasons. Sophomore Melissa Mattox has two tattoos and when asked why she decided to engrave her body, Melissa came up with a simple answer: "I like the way they look."

Vanessa Braco seems to be the epitome of body piercing. Adorning her body are a tongue ring, a lip ring, and until recently, a septum ring. She says, "People call it body art and that is what it is. It's body art."

People also choose to express themselves by dying their hair and creating exotic hairstyles. Freshman Eli Vaughan has sported black and blond hair (at the same time, no less), and also red and brown hair.

Trends express peoples' ideas and individuality. Though they may change over time, they will never fade from society.

### Sharing Close Quarters

The Bond Between Roommates

The one that takes the countless phone messages for you at all hours and the one who knows exactly how loudly you snore and what you look like when you wake up. No, it's not your mom or your significant other, it's your roommate. Some days they are our best friends and on others, our worst enemies. Yet, just as all aspects of college life have become a part of who we are, so have our roommates.

For freshmen, roommates are a part of the unknown that characterizes college. Often freshmen roommates become instant best friends.

A few lucky pairs make it

past the first few weeks and the friendship doesn't wear thin. Amanda Carson's relationship with her roommate has remained close because, "we are such opposites that we compliment each other perfectly."

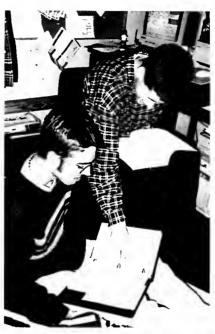

Roommates are more than just a person taking up half of the space in our already close quarters. They take on the roles of friend, counselor, family, and teacher. Together so much, more by circumstances than by choice, roommates have a relationship unlike any other.

-- Tara Dowling

Studying together, Brendon Weaver and Pat Day go over class notes. Coordinating study schedules helps get work done.

"My roommate always left the room twice: She'd leave, forget something and have to come back before leaving again." Julie Weinig

"Hi Ho, Jerry's shoe, the farmer and the Del." Kevin Leary

"She likes to sleep in late, through all her classes." Jen Barton

"She is extremely funny and she can always make me laugh." Sue Rossetter

"We share similar interests and enjoy doing the same things." Cory Huntzinger

# A Place of Your Own Decorating with Personal Style

Finally out on their own, students find decorating no longer a nuisance, but a pleasure.

Pictures, posters, cards, and collages cover every inch of wall space from floor to ceiling. Walls act as a canvas for self-expression. For Tracy Parker photographs of friends adorm her walls because "they remind me of home and give my room a sense of comfort." Doors mark another surface to cover. Students post signs, pictures, quotes, and holiday decorations all over the door to characterize their rooms.

Rugs, bedspreads, and additional furniture also provide the students with a chance to give their room its own personality. Though rooms begin the year looking traditionally plain, students make them over to seem like miniature apartments. Small tables, chairs, couches, and lofts brought from home also add a special touch to students' rooms.

Holidays provide an opportunity to add even more to the decor of students' rooms. Students find ways to make their rooms festive with holiday spirit. Pumpkins, strings of lights, door coverings and even Christmas trees adorn rooms throughout the halls. With home and family so far away, students have to make college a home away from home.

--Renee Gladfelter

With posters and pictures, Candace Benjamin decorates the hall outside her room.

Hanging up Christmas lights, Jessica Philips adds a little character to her room.

Mortimer the Frog serves as a cute addition to Heather Soper's room.

Joan Buhrman decorates her closet doors with photos of her closest friends.

A picture of baseball great Babe Ruth is proudly shown off by Mathaus Trager and Seth Gehman.

What one thing in your room do you consider your favorite decoration?

"My couch. It is comfortable and colorful." Cory Huntzinger

"My picture collage."

Corrine Julian

"My roommate's butterfly chair. It's great to sit in." Sue Rossetter

"My poster of Alan Jackson." Missy Kohler

"My Christmas lights outlining my ceiling because they give the room a warm, cozy feeling."

Kristen Raichel

"My poster of a man holding his baby because that to me is the sweetest thing in the world." Laura D'Aguanno

#### **Bridging the Distance**

Keeping In touch

"You've got mail," a broken dial tone, or a yellow slip in your mailbox, all mark familiar sounds and sights to students. With friends, family, boyfriends and girlfriends far away, students rely on communication technology to keep in touch. Today's technological improvements have given us many new ways of reaching out to our loved ones.

E-mailing has become a necessity to most students. With Internet access available in every room and labs set up strictly for e-mail use, students find it a quick, efficient and cheap method of communication. Students frequently use it to keep up with friends from home. Also essential to every student's room is the phone and voice mail services provided by Jaynet. Amanda

Haines couldn't imagine her life without the phone: "It's my connection to the outside world."

Despite new technology, the old standby of snail mail remains essential. It serves for keeping people in touch both on and off campus. Snail mail remains most popular for holiday cards and packages.

Since students' lives are centered on-campus, these methods of communication provide them with an off-campus link. As time passes and new and old technologies combine, students will be bombarded with more and more options for keeping in touch.

-- Tara Dowling

Emergency call boxes were installed for those who want to visit or were unfortunate enough to be locked out.

#### Moving Up in the World

#### Taking Advantage of the Options

We are fortunate enough to live on a campus that provides on-campus housing. But the time students reach their junior and senior years however, many are ready to get away from communal living and find a place that offers more independence, freedom, privacy, and of course, more space.

As Michele LaRocca put it, "Living in the Quads is a great experience. You still get to live with friends but there is more independence. We have our own kitchen and living room, and it makes you feel more like an adult."

For these reasons, many upperclassmen choose to

move into student Directed Learning Communities, the Quads, or off-campus apartments. These housing options give them the opportunity to live with just a few people of their own choosing and help with the transition they will have to make to living on their own after college.

While the residence halls may be more convenient most of them would probably agree that the pros far outweigh the cons of living on their own.

--Renee Gladfelter

Jayson Linard makes ironing almost seem like a fun thing to do.

Melissa White knows that one of the best things about being in the Quads is being able to eat whatever you want. Kevin Erickson lifts his feet so Ron Winward could finsish his share of the house cleaning. What is the best thing about living on your own?

"Having your own room." Cindi Rusin

"Having a driveway." Karen Schradin

"Making your own food." Nikki Gelfo

"Learning how to live more independently. And of course not having to go to the Caf." Marissa Minerva

"It's nice being in the SDLC because when you want things done you can just do them. It's nice to be in control."

Chris Ghiorzi

"I get to cook for myself, have pets and I don't have to go to hall meetings!" Jamie Graver

#### Those Things We Do

To relax and Have Jun

After juggling twenty papers, class presentations, countless meetings and a job, students need a way to kick back and relax. Whether through exercise, spending time with friends or some organized activity, students full every moment of free time with enjoyable activities.

With the presence of the Body Shop, on campus exercise becomes a hobby for students. Such activities as lifting weights or running on a treadmill allow students to take put their pent-up aggression from unmanageable schedules. Also, the convenience of an indoor work-out center appeals to the needs of students in the case of bad weather.

Socializing with friends marks another popular activity. Angie Vespa

explains, "People not only fill the role of friends but also that of family and counselors." Friends provide anything from comfort and sympathy to laughs and fun.

Finally, organized clubs and sports. With a wide variety of clubs in every possible area of interest and opportunities to play on a sports team, student have many outlets for involvement. The excitement of meeting new people, doing enjoyable activities, and filling time constructively draws students to join in around campus.

Whether alone or with others, we all find that one specific activity that allows us to be ourselves for a few hours each day.

#### Learning for the Juture

#### Classes Offer a Variety of Subjects

Classes may not be the first thing that come to mind when you think about student life but since they are the reason why we are here, they should be included. While they may seem to be a drag at first, even filling core requirements really isn't all that bad.

Who knew that you could get credit for things like scuba diving, horseback riding or even skiing? Besides physical education, the Core program can present the opportunity to try things you have always wanted to but never had the chance. Maybe you wanted to explore your creativity by taking ceramics, drawing or painting. These classses also give students the opportunity to explore all different areas of study to help them choose a major or add

a minor. After all, the idea of the Core program is to provide a liberal arts education and a well-rounded experience.

Major classes give an in-depth preparation for a career. Some classes involve presentations and papers. Some involve class participation, with students occasionally teaching the class. In some classes, students get to take field trips that reinforce what is taught in the classroom. Major classes may be a bit harder, but with the Core classes out of the way, one can concentrate on learning what is necessary for life after graduation. After all, the faculty try their best to leave a lasting impression with their preparation carrying us through our careers.

#### Finding Out How Students Relax

A 20 page paper due Monday. A 20 minute power-point presentation due on Tuesday and a test worth 45% of the final grade Wednesday. (Breathe!)

To most college student the definition of stress is when projects, papers, tests and presentations are due all at once and none of them are finished. This stressful feeling occurs at all times during the year. So, how do students cope it?

Some students will let people think for them by watching television. Annick Scillia explains, "I like to watch TV when I am stressed or do something that is completely mindless." Then there are the students, like Kim Swopes, who would rather excersise, "I like to run because it relieves all the tension in my body."

Also, to relieve body tensions, members of Harmony House hold programs in which students relax muscles by listening to calming music and a soothing narration. Then there are students who return to a time in life when the word "stress" couldn't even be pronounced and partake in childhood activities such as fingerpainting and coloring. Maybe Mom will hang up the creations on the refridgerator rather than the semester's grades.

#### Live in Concert

#### Don't Just Listen, Go See Them

Picture this: you're in a stadium full of people. You're starting to get impatient as you crane your neck and try to get a look at the stage. All of a sudden the lights snap off and the crowd breaks into a chorus of cheers as the band takes the stage. The hour that lasted forever is suddenly forgotten, as it all becomes worth the wait.

There is nothing to better compliment the college experience than to attend as many concerts as possible. Elizabethtown is perfect for this, as we are close to Lancaster and Hershey, a plethora of universities that offer concerts and if we really wanted to, we can make the trek to Philadelphia or Baltimore to catch a show.

There were many

concerts this year that were popular. Some favorites were the Mighty Mighty Bosstones and Live. Local shows, at the Chameleon in Lancaster, included Goldfinger, Sevendust, Creed and local boys Fuel.

Freshman Tara
Dowling attended the Lilith
Fair concert last summer and
claims it as her favorite
concert experience, "It was
such an amazing concert
because of its originality. It
brought together some of the
most powerful and talented
women in the music industry."

Concerts are an integral part of the college experience. Concerts allow the fans to feel close to the performers and that is important for both parties.

#### Campus Cuisine

#### Providing for a Variety of Tastes

It is five o'clock, you're winding down from that impossibly long day. Your stomach is giving you a little kick. How is this hunger satisfied? Well, if no one owns a car, you have to privilege eating on campus.

Myer Dining Hall is probably the most populated eating facility. Everyone knows the drill: stand in a long line, give their ID to the checker at the door and wait patiently while she swipes it. After the ID clears, students are home free. Students have a cafeteria full of food, salads, cereal, bagels, desserts, fruit and a wide variety of others.

Sick of the Caf? Why not eat at the Jay's Nest, located in the Annenberg Center. The atmosphere is relaxed and sociable. The best reason to eat at the Jay's is the meal exchanges and the food at the Jay's is good too. "It offers an edible alternative to the repeated meal cycle at the caf. And it has Jolt, "says Maggie Lileck. There are sandwiches, pizza, Friendly's Ice Cream, food from the grill and convenience store items.

Finally, there is the Roost, a nonalcoholic bar also located in the Annenberg Center. TV's and music, along with real bar stools, provide an enticing atmosphere to relax and socialize. The Roost serves drinks and munchies. Matt Waltz goes to the Roost because, "it's cheap, fast, easy and close to Brinser." The Roost is famous for its wings and its theme nights.

#### Taking Care of Business

#### Getting A Taste of Life After College

Students go to college for many different reasons, but they all know that the real purpose is to prepare for a career. However, by the time the typical student decides on a major, changes it and works on getting core requirements out of the way he or she may not feel like classes are enough preparation for facing the real world.

Internships and other student work experiences offer a valuable way to overcome this problem while providing many other benefits at the same time. They often serve to ease the transition from school to work and give students a chance to make sure

that what they have chosen as a career is right for them. Many feel the experience pulls together all they have learned and teaches them beyond what the classroom is able to do.

Elizabethtown interns work locally, in Harrisburg, Lancaster, York, or even at home over the summer. Internships are typically done junior year or the following summer. the work can be paid or unpaid, full or part time.

Internships give students more confidence and real life knowledge about their future career and are highly recommended as a valuable experience to have before graduating.

Working as a Programming Assistant, Laura D'Aguanno schedules the music for WRCN, an Active Rock radio station, on Long Island. Joan Buhrman learned all about public relations while working in College Relations. What is the most important thing you learned at your internship?

"I learned to rely on what I had been taught and to never be afraid to ask questions." Renee Gladfelter

"I learned about the elements that go into programming a radio station and many of the "inside things" about the radio business."

Laura D'Aguanno

"My internship helped me figure out what I want to be when I grow up." Darcie Ricca

"My internship taught me how much we have to learn from the older generation." Brandy Baumgardner

"The most important thing was learning how to deal with different types of people and the different situations they are in."

#### Economical or Extravagent

It Must Be Done

Everbody does it.
Everybody has a favorite place to do it. You can do it alone or with friends. You can even do it with your parents. It is a great way to relieve stress. Of course, I am talking about shopping.

Whether you are on a specific mission or just window shoppinfg, Etown can be spotten every weekend anywhere from teh Big K to Park City to the Outlets. Malls seem to be one of the most popular placed to shop. Many studetns grab friends and head out to find their favorite clothes and shoes. Friends provide advice on what lookks best, which is especially important when shopping ffor those special occasions. The outlets are another favorite.

College students on a budget can find great bargains on all kinds of brand name items.

But even if you do not feel like going out, you don't have to. the shopping will come to you. It seems as if every time you turn around there is something new to buy on campus, whether it be sweaters, sneakers, tie-dye shirts or posters. Don't forget about those sivler rings too.

Finally the College bookstore is yet another place to shop. What would you do if it was not there for those last minute birthday cars or other emergency purchase.

--Renee Gladfelter

Lisa Marshall and Sarah Armstrong check the menus for something to get to quench their thirst. Katie McDonald stops between classes to look at the string necklaces.

The Campus Peddler proves to be a favorite shopping stop for students.

Katy Sweeney spends an afternoon doing everyone's favorite chore--food shopping. Where is your favorite place to shop and what for?

"Outlets; they are close and have great clothing stores with cheap prices. Or, the shops and vendors along the streets of New York." Cori Huntzinger

"I like going to the malls--anywhere. I always shop for sweaters." Sue Rossetter

"The Gap--I head right to the sales rack in the back of the store." Jill Barket

"Definitely York Galleria for clothes." Candace Benjamin

"I like Bath and Body Works because everything smells so good." Joan Buhrman

"Clothes at the Gap!"
Amanda Sherren

"Outlet malls in Georgia because they have brand name stores for cheaper prices."

# Special Events

Many times when one looks back at their memories of Elizabethtown, they look at pictures and mementos. Captured in these items are not usually classrooms, work or papers, but the memories of special events at their alma mater. They are the events that leave the lasting impressions.

This year, Elizabethtown students participated in special events beginning with the Freshman Walk and ending with the graduation ceremony. Students found lasting impressions from holiday meals to homecoming events.

Seniors will leave their memories this year with lasting imprints from their own freshman walk to their own graduation. They have captured infinite memories in four short years.

 $\label{thm:condition} This exaggerated take on the New York fashion style in the 1920's, showed much of the French influence at the$ 

time and the need for every household, a highstanding position in society. Mrs. Tiffany set the overall comical tone of the play with her mispronounced French and high strung air of an aristocrat's wife. Her daughter Seraphina had a unique grace and style of walk...thump..., wait, walk...thump...upon the stage that made her footsteps seem so...thump...

light you would never hear her come into a room. Her daughter could make a whole room laugh with her own. She laughed very heartily indeed with a few snorts every now and then.

No sir, that was not the important part, it was getting her a husband, that Mrs. Tiffany wanted most. She chose the Count Jolimatre, played be Anthony Bosco, to be her daughter's mate.

"...Do da, do da. The enlightening scene changes are what made the play all the more enjoyable. One in particular had the crowd roaring as the Servant sang out his heart with "Camp Town Races."

A beautiful, sunny May afternoon and about 90 degrees in the shade. People mulling about in the Dell. Chairs, blankets and lots of people wearing square hats. Graduation Day 1998.

On May 16th at 11:00 am, seniors paraded through the Dell taking their first steps into the real world. The air was full of excitement, anticipation and fear. It was the same feeling the Class of 1998 felt during commencement only four years before.

As there has been in the past years, a speaker, Arthur L.

Farewell

Caplan, was present to give the graduates some final words of advice.

One change at graduation this year
was in the music. For the past few years,
musicians of Elizabethtown College have
had a chance to say good-bye to their friends

four and fellow students by playing at graduation. However, this year, The Philadelphia Brass, a

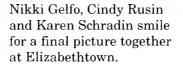

professional group, played in their place for the farewell march.

All in all, the day was beautiful. Seniors or shall I say graduates cried as they said good-bye to their home for the past four years.

## The Final Impression

It was only four years ago when the Class of 1998 walked the Freshman Walk around campus. It was then they were introduced to the Elizabethtown community by being taunted and teased by the upperclassman.

But these incoming freshman quickly rose to the top and became leaders for the next three classes that arrived after them. The Class of 1998 became role models for the campus community, academically, athletically and socially.

Whether it was staying up late to cram for a biology final or cheering on the Blue Jays to another victory, the seniors utilized every moment spent at Elizabethtown. These moments will soon be memories of times spent with best friends, roommates and classmates.

But now it is time to fill out the resumes, put on the caps and gowns and receive the diplomas. The members of the Class of 1998 have reached the climax of their undergraduate careers. For some, it means continuing their education in search of a higher degree. For others, it means the long-awaited beginning of the job search and entering the work force.

Well-prepared for their next journey, the 1998 graduating class of Elizabethtown College will take with them the values and knowledge gained during four years of hard work and commitment.

Four years and over a million miles and dollars later, the Class of 1998 has made and will take with them a lasting impression.

# More Than Just Bricks

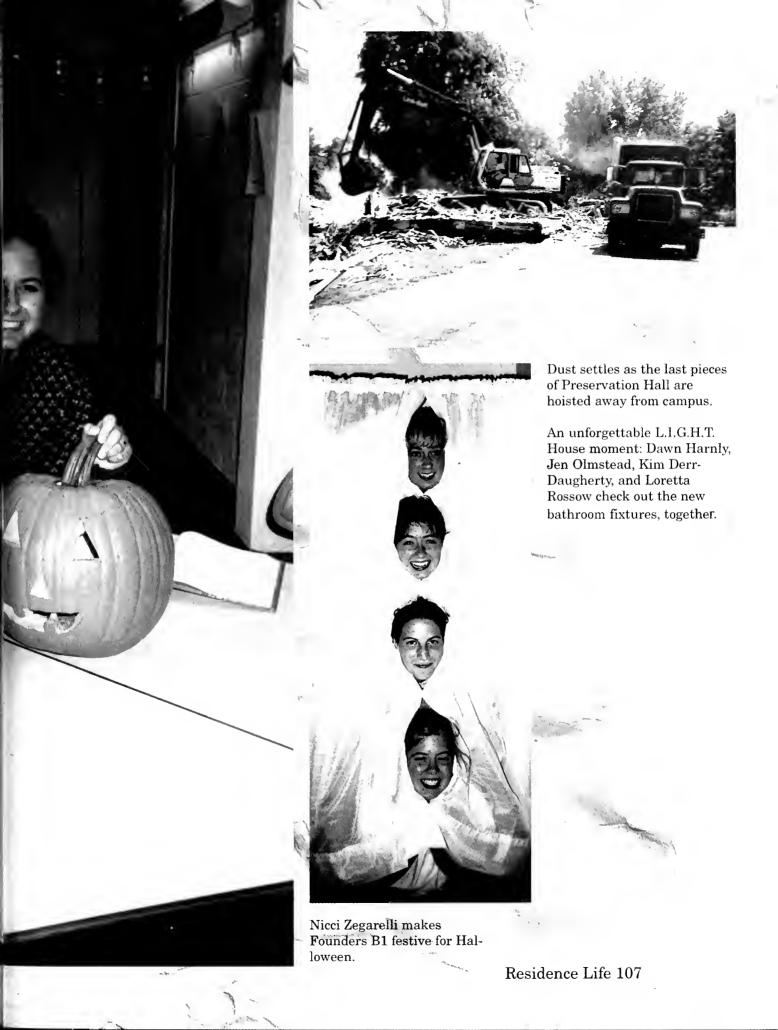

A lasting impression of Elizabethtown's residence halls and SDLCs? Bricks on the outside and paper thin walls on the inside (not to mention those newly locked doors)... But, there's more inside those big doors. These buildings' impressions are more than just brick and mortar. An inside look at Elizabethtown's residence life shows the friendliness and family atmosphere brought about by peers working hard and playing hard. Freshman, sophomore, junior, or senior -- whatever the major, each person at Elizabethtown can find a place to belong, a place to make an impression.

Throughout the year, each resident makes a lasting impression on his or her own life through academic and social activities. Each person also makes an impression on the people right-next door. Remember that noisy neighbor? - or, how about that time you woke up to the vacuum cleaner?? But, what about the time when you got that nice message written on your door -- and those quotes your neighbor always had on the dry-erase board that either confused you or made you smile all day?

From the color of the carpet to the midnight chat with a new-found friend, residence life at Elizabethtown makes impressions that will last forever. Just think back to that time when you ate dinner with your hallmate or when you had enough and turned up your stereo for the "10 at 10:00" during finals week. Think back, there's a lasting impression in there somewhere amidst the bricks.

# Brinser

According to those who live there, Brinser is one "hot" building. Freshman David Stough remarks that "the fire alarms go off all the time." Sophomore Eric Nussey will have lasting impressions of the time "when the bathroom was on fire and my roommate and I didn't evacuate the building. . . !" Speaking of things that make temperatures rise, sophomore Paul Urso and his friends caused a stir when they "dressed up in drag for Halloween."

There are always

surprises in Brinser, some after weekend fun and some when residents take a study break to pull a prank on an unexpecting resident.

A three year veteran of Brinser, Josh Jerry, describes Brinser as "a place you could always be yourself." Obviously a place where one can find "a bunch of friends," a three year veteran's lasting impression of Brinser is summed up in one word, "fun."

The overall lasting impression felt by Founders residents is the warm and friendly atmosphere. "My lasting impression will be how much everyone bonds with all of the people on the floor. It

didn't take long at all for us to become friends," stated Emily Leasure.

Jen Coe summed it up by saying, "My lasting impression of Founders will be our eccentric room arrangement, all the different kinds of music heard through the halls '24-7', and the talkative, supportive, funny RAs who care at this friendly home away from home."

# Myer

Why do Myer's residents love their building? Myer residents enjoy the closeness that develops among people on the hall and the occasional ghost story . . . Is Myer really haunted? Mostly though, Myer residents enjoy the closeness to the cafeteria. It is easy to tell who lives in Myer - they are the people in the caf who are wearing shorts in December. "If I really wanted to, I could go to the caf in my pajamas," said sophomore Amy Clifford. Freshman Becky Putnam agreed, as she said "it's right above the food."

Along with the blessing of the caf, the residents of Myer become close with their hallmates. According to resident assistant Erin Brett, "there's a friendliness about the residents in Myer that makes this residence hall feel like home."

Apparently, long after Myer residents have forgotten the stress of studying for finals, they will remember the friends they made in these halls, and above all, the lasting memories.

It is always fun rounding up hallmates for a break from the books and Ober residents find fun every day. Group activities organize themselves all over Ober. Residents of Ober support that statement, because they see them happening all the time. Joe Godfrey will not soon forget the wild and crazy "Ober Wrestling Federation events." Julia Veenema has often wondered "do the guys ever stop playing pingpong?"

These events can lead to great friendships and more great times. Mike Bonham would agree as he and his neighbors always "roll to dinner as a hall."

Royer's residents love their building for many different reasons. Kate Brown will have lasting impressions of her "weird next-door neighbors."

Nanda Mitra agrees that the personalities of the students add to Royer's charm. "It's friendly, warm, and lovable," she says.

"It's where my best buds live," claims sophomore Jay Hartney. In addition to the students' personalities, there will be many fond memories of the building itself. The "halls are good for bowling," according to Heather Erney.

Kristen Rippman will remember fun times when residents helped spruce up the dorm by "exploding on the halls with tacky holiday decorations!"

# Schlosser

One of the easiest places to meet people at Elizabethtown is in the residence halls. With so many people on a hall, there is nearly always someone around. If you ask the residents of Schlosser why they like their building, the recurring theme is friendship. Cathy Czerwinski said, "I met some really cool people who became really close friends, who will probably stay with me throughout my life."

Jen Jacobellis agreed. "I met a lot of my friends in this dorm freshmen year, and we've all remained in this dorm and remained friends, so we have fun creating many lasting memories."

The residents of Schlosser will carry the friendships they have made on their halls with them, and always remember their residence halls as part of their lives.

# Impress Me

Raising a college student from the innocent freshman to the self-sufficient senior is hard work, but here at Elizabethtown, the staff seem particularly eager for the challenge. From our first bouts of homesickness to the overwhelming stress of the job search, there is always a supply of surrogate parents on hand to make each new trial a little easier. They are a unique group of people, acting as both mentor and friend; judging us fairly yet admitting their own fallibility. Here on our little plot inward-gazing ground, they are our first real look at the expectations of the real world outside.

Administrators work to give us an environment that will nurture and experiences that will educate. Faculty allow us to recreate ourselves by encouraging dreams and producing new doors to unlock. And staff are invaluable in reminding us that this is not just our college; it is our home. We put ourselves on display everyday in this new home. We are constantly making our mark and actively seeking to answer the command, "Impress me!" At times it seems to be an impossible request but inevitability reflects the best that each of us can become. For while we are all ready to believe that we can make it on our own, it is comforting to know just how many people are watching for us, expecting the best from us and preparing us to do one thing--to impress the entire world.

# Impressive Deeds

"When I first arrived at Etown, I wasn't sure who I really was. So, I spent the first semester trying everything and anything, hoping that I might locate the real me. Nothing seemed to work and pretty soon I was in danger of failing out entirely. But at a time when professors were beginning to doubt me, I was befriended by the Dean of College Life.

I spent many hours talking to him about my past and more importantly, my future. He was always ready to listen to me and instead of offering quick solutions or easy advice, he was patient and guided me in creating my own answers. I never expected to become so close to a member of that far away group called the "Administration" but I know that the past three years have been shaped by his honest interest in my life."

"In high school, I was always a straight-A student and I was used to work coming easily to me. At Etown, however, I was suddenly uncertain about my ability. I wasn't used to asking for help and I only visited the Learning Center because a professor suggested it to me. Though I only intended to see my tutor once, I soon realized that the center had much more to offer than academic help. I felt comfortable talking about professor's personalities, the problems of dorm living and my own terrible time management skills. Regardless of the problem, they always had a variety of solutions for it and they were always ready to discuss them with me. I feel more prepared for the next few years knowing that I can rely on other people's experiences as well as my own."

The professor was not only quick to ask what happened to her but was also help her solve the problem. After class her fought her case with her advisor and they were able to reach a compromise. # Tribute to Professor John W. Stites From His Son Sean

When thinking of things to say about who my father was, I felt it appropriate to mention a pertinent choral warm-up he had his groups do occasionally. He would make the group enunciated the words "vim, vigor and vitality" on one pitch and move up one-half step, always balancing technique, diction and most notably a rich expression of the words sung. These three words, "vim, vigor and vitality," eloquently describe my father in all aspects of his being.

Like my early description of that choral warm-up, my father balanced the demands of technical precision with an exquisite understanding of and a hearty appreciation for the joy of music along with the value of challenging people to reach their greatest potential. In other words, my father was an extremely gifted educator and artist in all senses of those terms--one that blended discipline with compassion and a scholarly interest with a pure love of his work.

In closing my remarks about the most remarkable man in my life, John Stites loved to learn and teach others about the joy of life through music. I believe that those who had the privilege to work with him as I did, would readily testify to his fervent spirit and his infectious and unquenchable zest for life. He loved people as genuinely as anyone could-his compassion, warmth and understanding endeared him to us all.

## Sports

The roar of the crowd, the sound of a swish through the net or a ball being slammed to the floor is nothing new for the Elizabethtown sports teams.

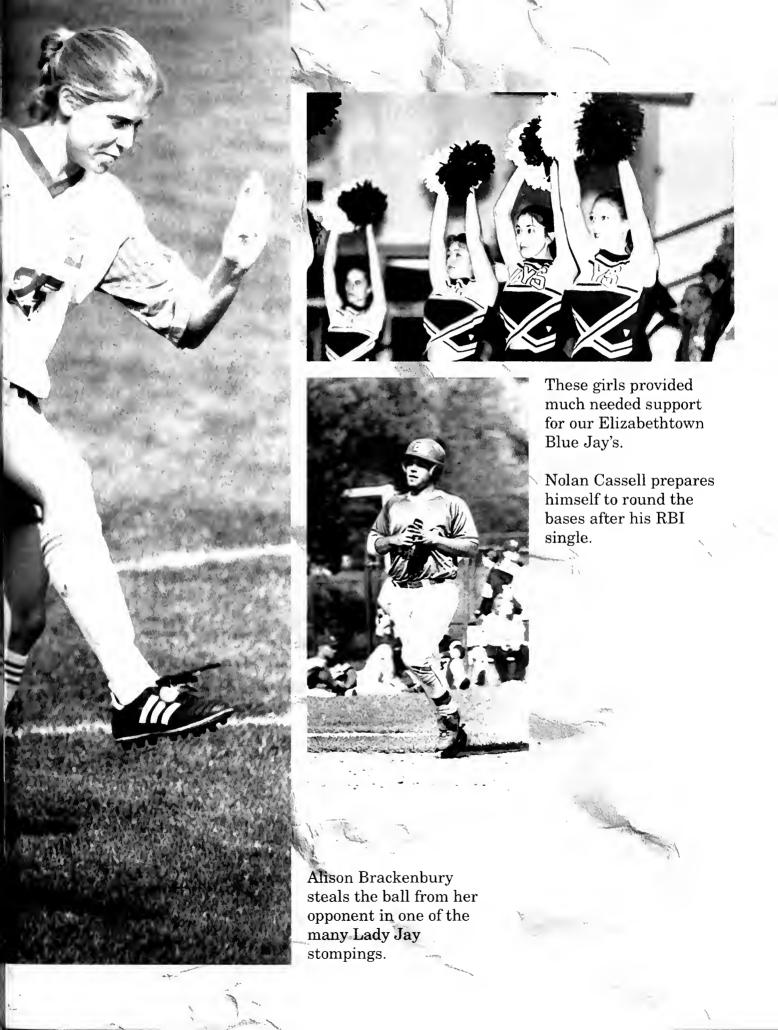

History has shown that the community spirit at Elizabethtown lives on through all aspects of college life. The support and dedication of the fans for the many sports teams at Elizabethtown is greatly appreciated by all.

This year, the teams have left a lasting impression on the history books. Records were broken for most doubles in a season, most kills and digs in a college stance and milestones were met for career wins for a few of our coaches. Some teams saw tremendous turnarounds while others dealt with difficult rebuilding seasons.

All of the Elizabethtown
College sports teams are to be
commended for such an outstanding
year and another few exciting and
impressive pages in history.

# Making An Impression

During your first few weeks as a freshman, you may be bombarded by first impressions of your peers, professors and the campus itself. As time passes you begin to form lasting impressions of these people and places.

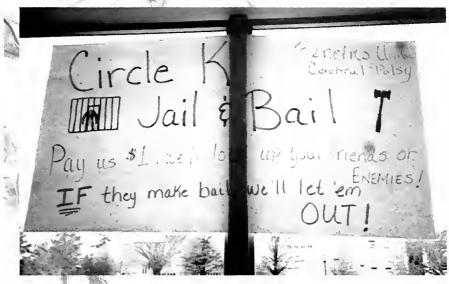

Participating in various campus activities are just one way that wonderful lasting impressions are formed. But the great thing about these activities is that you and other club members are not the only ones left with a lasting impression. Whether it involves volunteering for Into the Streets or helping someone in another way, club participation often means doing something to benefit others.

Throughout this section you will see clubs such as Campus Gold, Sock and Buskin and Tri-Beta. In these and other clubs, you may see people who volunteer time with youngsters, provide entertainment for the college community or work to clean up the environment. Although, regardless of the task, it is during such activities that members become closer friends and that others who are involved will have memories that will last a lifetime.

### ADVOCATES FOR PEACE

Advocates for Peace is a club advised b Professor of Religion, Gene Clemens. This year the club has about fifteen to twenty active members that participate in a variety of activities. Anyone interested in doing things for others and searching for inner peace can join the club, it is open to anyone on campus.

This year and in previous years, the club has had a big fund-raiser during Homecoming. Working together, the club raised money by selling pretzels to fellow students and faculty. These were soft pretzels designed to look like peace signs. The club also has a section of highway that they take care of and clean up. Not only do Advocates for Peace members clean and raise money, they also publish a paper one or two times a year.

This paper is called "Writing on the Wall" and contains political and humor articles.

Although it may sound that this club is not as active as other on campus, what they do benefits many people. Kelly Mosteller, a member of the club for three years, sums up the club's intentions, "Advocates for Peace is unique because it provides a forum in which you can explore inner peace and it's connection to the greater world. It is an inspection of the soul and community."

The club is flexible and allows for a diverse group of people to join. As club copresident, Beth Szymoniak puts it, "Advocates for Peace can be whatever members want out of it because it is flexible to adapt to every member's values and interests."

Campus Gold volunteers with local Girl Scout troops and participates in activities such as Sing and Swim, in which about 300 Girl Scouts from local neighborhoods visit the Elizabethtown pool to swim and learn new Girl Scout songs. Campus Gold also does such college oriented events as selling Girl Scout cookies and an Annual Easter Egg Hunt.

With about twenty-five members, they put in about 1500 community service hours. The group does many service projects throughout the academic year. They have worked with the Ronald McDonald House, United Cerebral Palsy Foundation and had many fundraisers.

Their fundraisers included the very popular Jail-n-Bail. Circle K also holds car washes and sells t-shirts for humanity. The money they raise goes to charity. Anyone can join Circle K. Jenn Wilson says, "all you need is to be willing to help."

# COLORS UNITED

Colors United is an organization with the mission of teaching values of various cultures in the United States and around the world. Colors United seeks to promote, support and strengthen a community interested in the richness of racial and crosscultural values by developing special campus programs such as trips, publishing newsletters, guest speakers, multi-cultural movies and dances. Their outreach projects also include encouraging the entire Etown campus community to be more understanding of one another's cultures and backgrounds. This year, they have continued ti influence other's awareness, understanding and appreciation.

E-Motion, the dance club on campus, has accomplished a lot in a short amount of time. A few years ago the dance club participated in such events as the Spring Arts Festival and Into the Streets, but felt there was something more they could do to show others how much they love dancing.

Now along with such events as Homecoming floats and Dance-a-thons, E-Motion has had it's second annual Dance Concert. This concert allows E Motion members to showcase a variety of dancing styles for the college community to see.

Sue Glickman, president of E-Motion, felt that this years concert left quite an impression on many of the club members. "People work so hard for the Dance Concert and many members who didn't realize that they had choreographing talents and leadership abilities, find that they developed them during this time."

# MELICA

Melica, the all-female acapella group, is dedicated to demonstrating their love of singing to the college community. Before they can do that they mus have auditions in the fall. Melica auditions include variables such as the singer's range, pitch matching and rhythmic accuracy.

After the members are chosen, the group begins practicing about three times a week in preparation for such events as Christmas concerts and services.

This year, Melica was involved in Acapalooza, and group member Janelle Boyd identified that event as the one that left quite an impression on Melica. Boyd commented that, "Acapalooza gave us an impression of the potential that we have."

Melica also began a tradition which may leave lasting impressions on others in the future. This event is the Professor's Tea. At this event professors gather at the Roost during finals week to relax and listen to the voices of Melica.

## MENTORS

Mentors is a group of college students who meet every other week with several teenage girls from Elizabethtown High School.

Mentors members participate in social events with the teens as well as tutor them during meetings.

President Michelle Hickey talked about how rewarding working as a Mentor is. However, it is sometimes hard to tell if Mentors are making a lasting impression. Hickey identified this uncertainty with that statement, "Sometimes you feel like you don't make a difference with the girls but then you find in the end that you do."

Along with the tutoring, members involve the teens in such activities as, socials at the Roost, sports and watching movies.

# PHYSICS AND ENGINEERING

Physics and Engineering majors or minors make up the majority of the Physics and Engineering Club. However, anyone interested in this field is welcome to join.

Throughout the year, the Physics and Engineering Club participates in such activities as trips to Hershey Park and an annual picnic/softball game with the Math Club.

Creating a Haunted House in Esbenshade every Halloween is one of the clubs trademarks. Beth Szymoniak, a Physics and Engineering Club member, felt that the Haunted House left a lasting impression on her. # PSYCHOLOGY CLUB

Psychology Club members participated in many different events this year and became a close-knit group as a result. One event that left lasting impression on Psychology Club president Melanie Bujung was the Eastern Psychological Association Conference in Boston. She said, "Boston bonded us as a club and as a departmen The trip made us closer and the sessions strengthened our interest in the field of psychology."

Bujung also stated that one of the major "goals of the club was to have more student-professor interaction outside of the classroom. Not only through the trip to Boston but through such activities as dinner with the Psych. Professors at the Roost, redecorating the psychology department and various other events."

# SIFE

Students in Free Enterprise, SIFE, is an international organization with the mission of teaching the values of free enterprise. Their philosophy is "tell me and I will forget, show me and I might remember, involve me and I will understand."

For the past ten years, SIFE has been sharing this motto with others by developing special programs. These outreach programs involve the community in the free enterprise system, providing the students with an opportunity to teach what they have learned. SIFE programs reinforce business, education and communications instruction.

Each year SIFE students display their work a both regional and international competition. This year's projects included delivering food to the needy, donating computers and establishing a library at children's homes. SIFE has been recognized for their distinction and strenuous work. Recently, SIFE ranked in the Top 20 of over 500 institutions. SIFE plans to continue to strive for excellence.

# SOCK & BUSKIN

Sock & Buskin is dedicated to showing support for drama productions on campus. Anyone interested in drama is free to join and may have the opportunity to work in the box office, backstage or act in the drama productions.

Although Sock & Buskin participates i Into the Streets, Homecoming and takes trip to New York City, they are best-known for their One-Act Plays. The One-Acts are short drama performances directed and acted by the students.

Karen Cashin, a member of Sock & Buskin, feels that another one of the groups most important goal is "bringing the art of theater onto campus."

### TRI-BETA

This year was the turning point for Tri Beta, the Biology Honor Society. Angie Shaeffer, a member of Tri-beta, felt that this year lest a lasting impression on her because "the seniors were the last of the initial member."

This year the members of Tri-Beta helped the Biology Club clean Canoy Creek for Into the Street. Other events included tutoring sessions for Biology classes twice a week and the Tri-Beta Bio Bit in the Etownian.

In order to become a member of Tri-Beta, one must have sophomore status, as well as good academic standing in biology classes.

Dear Alison.

Always remember years from now you will not be disappointed by the things you do but rather by the things you did not do.

Because of this, our advice to you is this: Sail away from the safe harbor, catch the trade winds in your sail, dream, explore, discover.

We love you and are very proud of all you have accomplished.

Dear Twinkle Fingers.

When you started out in nursery school so very long ago, your successes today were things you didn't know. Your first piano lesson was when you were in grade three. And now the music you create resounds most heavenly. You can make the ivories dance at your fingertips. While the melody is song flowing from your lips. You have worked so hard to earn you B.S. in Music Therapy. That is something that your Dad, Mom and sister Paula are very proud to see. So Pamela, this only goes to prove you have the strength to perservere. And as you graduate from college, we wish you success in coming years.

Love, Dad, Mom and Paula

## Capturing Impressions

Laura D'Aguanno, Editor in Chief, would like to thank the following people for their contributions to the completion of the 1997-1998 Conestogan:

Ed Patrick Jr., Taylor Publishing Representative, believing in me to get the book done without needing to hound me! And thanks for all of the great lunches and dinners.

Tamara Gillis, Advisor, for keeping that "hands-off" advising policy and believing that I would get the book done.

The Editorial Board and staff for all the hard work and learning all about the word, responsibility! A special thanks to Steph Reiner for always being willing to take a picture and Darcie Ricca and Maria Musso for helping me during those final days.

The students who answered the Student Life Questions for your comments and time.

Kristen Kane tries one more time to schedule the final Staff photos.

Sarah Blackford works hard making sure all the Proud Parent orders are together.

## Lasting Impressions

As we end another year of our college life, we look back at the impressions the we made and that others made on us. As the seniors leave Elizabethtown College, they will be looking back at their college years to see what impressions were made that will guide them through what everyone calls "the real world."

Through the years we have counted on the many faculty members to make a lasting impression on us. This year we sadly said good-bye to one of the most influential faculty members, John W. Stites, who will be missed.

It is these experiences that teach us to be strong, to learn, to understand and to make a lasting impression on everyone we meet.
